ABOUT ME

As a Full-Stack Engineer with three years of experience in the IT sector, I specialize in architecting robust backend systems and building intuitive frontend interfaces. Leveraging a strong analytical mindset, I thrive in Agile environments, consistently delivering high-quality, scalable solutions within tight production cycles. I am dedicated to continuous professional development, staying at the forefront of emerging technologies to drive technical innovation and operational excellence.

TECHNICAL SKILLS

BACKEND

Java | Spring Boot | Microservices

WEB TECHNOLOGIES

React.JS | Next.JS

DATABASE TECHNOLOGIES

Oracle | DB MySQL | SQL Server

DEVOPS

Gitlab | Jenkins | Docker | Kubernetes | JIRA

AUTOMATION TESTING

Jest | Junit | Mockito | Jmeter

QUALITY

SonarQube

OTHERS

Prompt Engineering | Clean Code

EDUCATION

MASTER OF ENGINEERING

National Institute of Posts and Telecommunications

2019 - 2022

PRE-ENGINEERING FOUNDATION STUDIES

Reda slaoui
2017 - 2019

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

Eurafric Information | Jan 2025 - Present

- Legacy System Migration:** Contributed to the migration of legacy projects to modern frameworks, ensuring a seamless transition and improved system performance.
- Architectural Optimization:** Refactored core modules by adapting SOLID principles, resulting in a more modular, maintainable, and scalable codebase.
- Agile Project Coordination:** Managed end-to-end tasks within Agile/Scrum frameworks, translating business requirements into technical roadmaps while meeting tight delivery deadlines.
- Quality Assurance & Testing:** Implemented rigorous Unit and Integration testing and conducted peer code reviews to ensure system stability and minimize production vulnerabilities.

SOFTWARE ENGINEER

Intelcia IT Solutions | Sept 2022 - Dec 2024

Project Management & Coordination

- Agile Lifecycle Management:** Managed end-to-end project tasks within Agile/Scrum frameworks, coordinating with stakeholders to translate business requirements into technical roadmaps.
- Delivery Optimization:** Ensured consistent delivery of high-quality solutions within tight deadlines by streamlining development workflows and prioritizing technical debt management.

Product Testing & Quality Assurance

- Comprehensive Testing:** Implemented rigorous Unit and Integration testing to ensure the stability of Microservices and frontend components.
- Quality Benchmarking:** Conducted thorough Product Testing and peer code reviews to maintain architectural integrity and minimize production vulnerabilities.
